Transforming Federal Records Management

Directive Goals

- Require electronic recordkeeping to ensure transparency, efficiency, and accountability.
 - By 2019, agencies manage all permanent electronic records in electronic formats
 - By 2016, agencies manage permanent and temporary email in accessible, electronic format
- Demonstrate compliance with Federal records management statutes and regulations.
 - Role of Senior Agency Officials
 - Accountability and training

The screenshot shows the National Archives Records Express blog interface. At the top, there's the National Archives logo and navigation links for RSS, Share, Facebook, and Twitter. The main header reads "Records Express: Official blog of the Office of the Chief Records Officer at the National Archives". Below this, a breadcrumb trail shows "Home > Blogs > Records Express".

The main content area features a post titled "Comment on and Discuss the Automated Electronic Records Management Report and Plan" by Arian Ravanbakhsh, dated March 10, 2014. The post text discusses the completion of a draft report and plan to satisfy Managing Government Record Directive Goal A3.1. It mentions that the draft is available as a PDF for review and discussion. The author notes that the report addresses suitable approaches for automating ERM and discusses their outcomes, benefits, and risks. The goal is to finalize the report in May 2014, incorporating comments. The report covers the goals of electronic records automation, NARA's stance on DOD 5015.2, and a framework of 5 suitable approaches to automation. The plan, on the other hand, will remain a living document, revised at least once a year as initial tasks are completed. The author invites both Federal agency staff and information management experts to provide input by commenting on the blog.

On the right side of the post, there's a calendar for March 2014 and a list of tags including appraisal, ARMA, backup, BRID, capstone, census, Chief Records Officer, classification, Compliance and Oversight, disaster, Preparedness, Disposition, draft, e-forums, electronic records, management, email, ERA update, FAQ, FRCP, GAO, GRS guidance, ISO live conference, NAGARA Open, Government OPM, RAC, RACO 2010, RACO 2011, RACO 2012, Records Control, Schedule, Records Management, request, RIA, RM Directive, and Self-assessment.

On the left side, there's a search bar and a list of categories including Email Management 2.0, ERA, FRCP, General, Presidential Memorandum, RACO 2009, RACO 2010, RACO 2011, RACO 2012, Records Disaster Preparedness, Regional, Uncategorized, and Upcoming. There's also a "LINKS:" section with links to AOTUS, Collector in Chief, Education Updates, Media Matters, NARAtions, and NDC Blog.

Canada

Canadian Context

Over 50% of enterprises identified that the introduction of technology lead to greater information sharing and changes to data collection

The Canadian Government plans to ensure that over 98% of Canadians have access to high speed internet, even in the most remote parts of the country, by 2017.

More than half of Canadian enterprises used Internet-enabled mobile devices (2012)
